Secure with Confidence™

Managed Security Operations

▶ Security Operations are the necessary foundation for effective cybersecurity

▶ Dynamic threats require Active Defense

▶ Recon Managed Security Operations includes MDR, but that is just the beginning

The Journey to Cybersecurity Confidence

While increased awareness of threats has led many organizations to adopt better tools, these tools can create problems that make it hard to progress further. Managed Security Operations by Recon alleviate that burden and give organizations real confidence that their customers, data, and people are safe.

Where are you on this path?

4

Zero Trust
- Inherent Security
- Continuous Improvements
- Device, User, App & Data Security

3

Active
- Security Operations
- LOG AGG / SIEM / SOAR
- Threat Hunting
- Incident Response

2

Prevention
- EDR
- Firewall
- Email Security

1

Basic
- Supported HW & SW
- Patch Management
- Backup & Recovery

Tools Are Not Enough

Even with powerful security software, organizations can struggling with:

- **Alert Fatigue**: Countless alerts from various security tools can overwhelm staff and lead to missed critical threats.
- **Manual Effort**: Responding to untuned and uncorrelated alerts drains valuable IT team resources and time.
- **Misconfiguration Risks**: Configuration changes to reduce alert volume can inadvertently silence critical alerts.
- **Response Concerns**: Without dedicated specialists it is difficult to respond effectively.
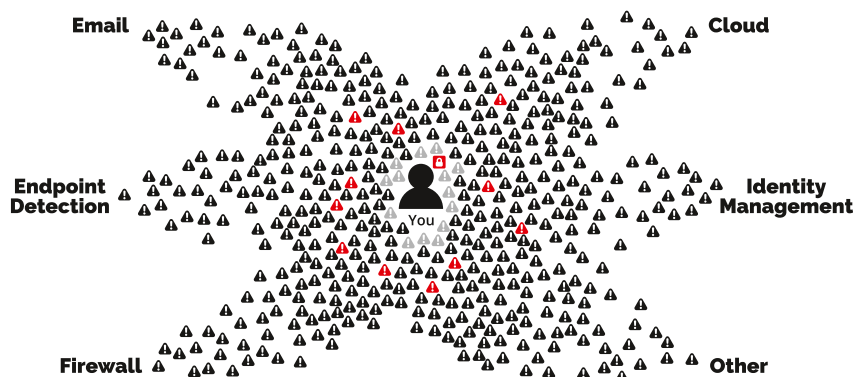

Get More With Recon

Managed Security Operations from Recon bring a platform, process, and expertise to the security equation to offer:

- **Greater Confidence**: Enjoy a robust security posture and the assurance defenses will work against new and evolving threats.
- **Active Defense**: Leverage comprehensive visibility; fast, accurate, actionable answers; expert triage, investigation & escalation; and immediate Incident Response.
- **Liberated IT Hours**: Regain invaluable time to focus on strategic initiatives while experienced professionals stand guard.
- **Proactive Guidance**: Gain partners who are guardians providing proactive advice to improve security.
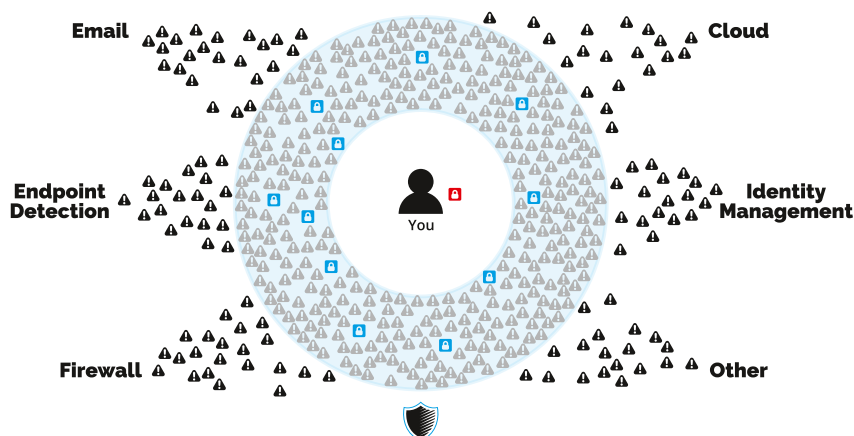

Take the Next Step

We are a passionate team of skilled defenders serving businesses, government agencies, and schools of various sizes across the United States. If you lack confidence in your organization's cybersecurity for any reason, we hope you will reach out for a confidential, no-commitment consultation. Protecting the good from the bad is what motivates us, and we want to help.
